

COMPOUND PHYSICAL PARAMETERS

INCI FILE NUMBER B164	LOT NUMBER
PHYSICAL STATE Brownish-gray powder	
<p>The pH of a 50% concentration of B164 in water was calculated to be 4.82 at 25°C according to the extrapolation procedures by Dr. P. D. Schickendantz, Lorillard Research Center Accession Number 1662.</p>	
SOLUBILITY (See SOP for Biological Solutions) <small>ORAL</small> Reference: BC20-48 B164 forms a suspension in corn oil at 0.5 g/1.5 ml Triple dosing is required	
ACUTE CARDIOVASCULAR (See SOP for Determination of Solubility of Materials for Acute Cardiovascular and Respiratory Effects Study in Beagle Dogs) <small>ORAL</small> Reference: BC20-48 B164 is insoluble according to this procedure	
STORAGE RECOMMENDATIONS: Refrigerate in amber glass bottle at no more than 8°C	
COMPOUND SENSITIVE TO <small>(O) AIR (U) HEAT (F) MOISTURE (I) OTHER</small>	
SAFETY COMMENTS (SUGGESTED HANDLING PROCEDURE)	
SIGNATURE
